COMPANY INTRODUCTION

We are Ronak International, boasting 48 years of industry experience. Our track record of global success positions us as key players in the UAE market, offering an exclusive stone collection. Our expertise lies in curating a diverse array of premium materials, ranging from marble, porcelain, quartz, Granite, and artificial marble, from renowned origins such as Italy, Greece, Turkey, Portugal, Brazil, China, Vietnam, and India.

At Ronak Group, we provide a comprehensive selection of building materials, serving as a singular destination for all construction requirements. Our commitment to sustainability and innovation drives our ethos, reflected in our next-generation product offerings. We are dedicated to catering to every client's unique needs, offering tailored solutions through our cut-to-size facility. Our unparalleled strength stems from our extensive experience and proficiency in supplying materials for diverse projects.

With a steadfast focus on competitive pricing and prompt delivery, we consistently prioritize our customers' satisfaction. At Ronak International, we are committed to empowering you to shape your future.

OUR PRODUCTS

- Onyx
- Granite
- Quartz
- Lime stone
- Artificial Stone
- Porcelain
- Marble
- Soft Stone
- Travertine
- Ceramics
- Acrylic Stone
- Sintered Stone

QUALITY CONTROL PROCEDURES

INTRODUCTORY STATEMENT:

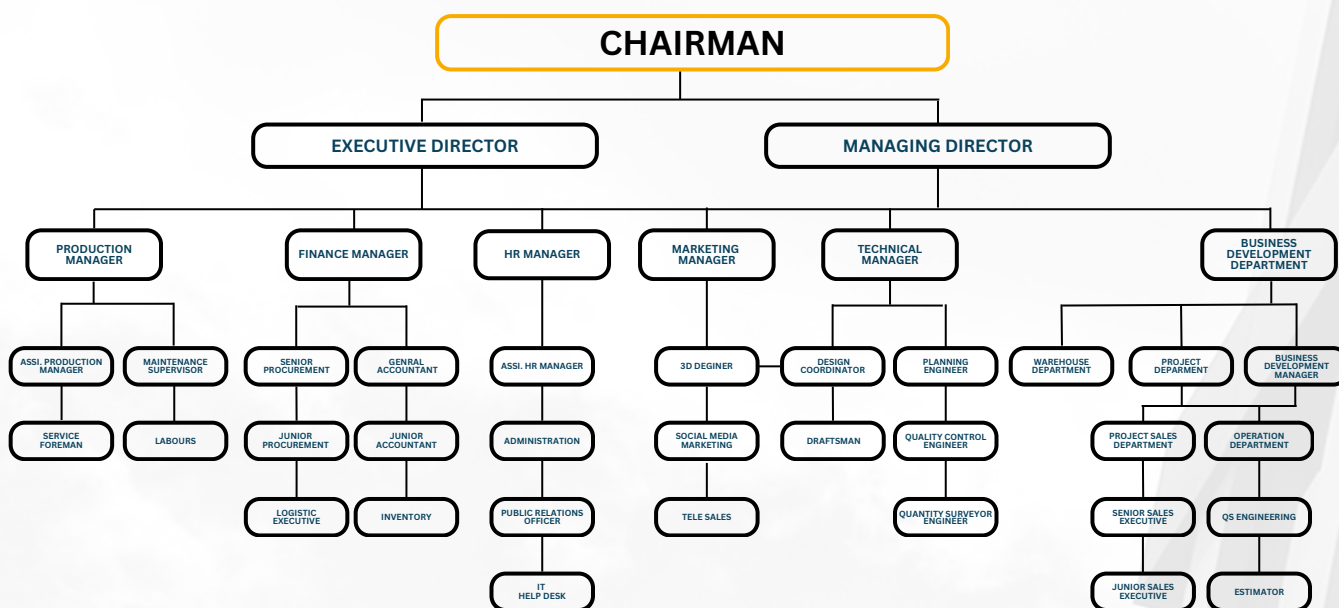

At Ronak International, we take immense pride in the impeccable quality of our marble and granite craftsmanship. Every member of our team is actively engaged, thoroughly versed in industry best practices, and wholeheartedly dedicated to delivering outstanding final products.

Our company ethos revolves around meeting customer needs through the provision of consistent quality and upholding professionalism through ongoing enhancements in procedures, technology, and material selection.

Please find below the detailed procedures we adhere to in pursuit of our company policy.

ORGANIZATIONAL CHART

QUALITY CONTROL PROCEDURES

DESIGN INTENT CONTROL:

Ronak International meticulously reviews project designs, specifications, and proposed natural stone selections. This includes a thorough examination of the finish, thickness, dimensions, and quantities of the stone to gain a comprehensive understanding of the project and client requirements. Our team of experts actively collaborates with clients to ensure optimal material selection. We confidently offer our insights and expertise if potential concerns arise regarding aesthetics, performance, durability, or material availability. This collaborative approach safeguards against any compromises in the final outcome.

The following outlines our procedures for achieving this commitment to excellence.

SLAB INSPECTION :

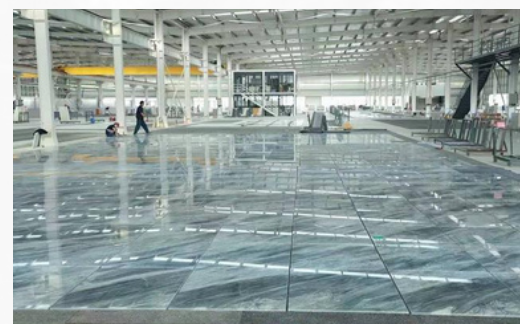

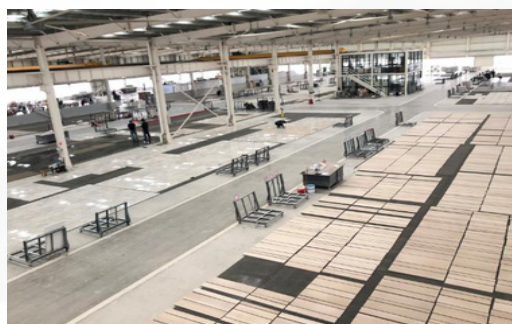

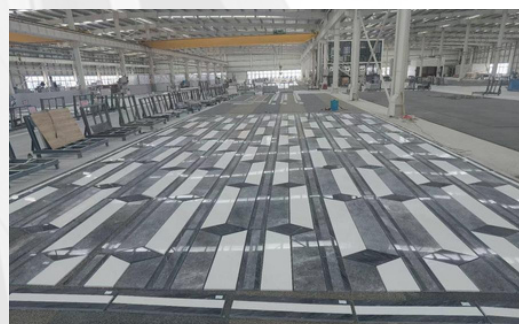

Each natural stone slab is controlled upon arrival in our yard for :

- Background color / tonality versus the approved range for that project.
- Visible cracks.
- Sizes
- Direction and orientation of blemishes if any.

CUT TO SIZE & DRY LAYER :

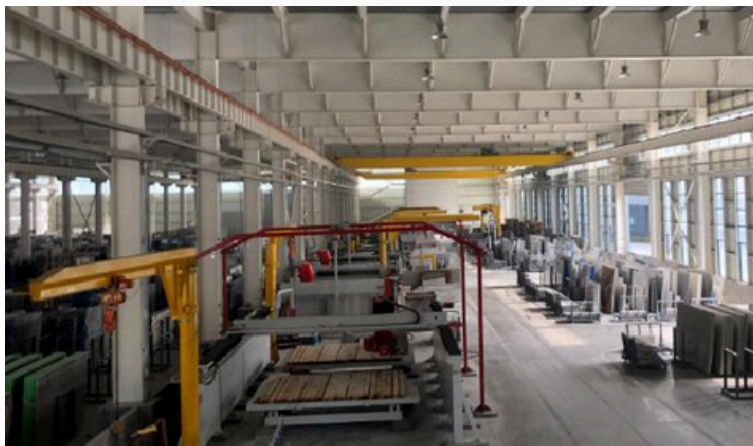

Each natural stone slab is carefully checked for thickness, color/tonality range and blemishes before being directed to the cut to size operation.

QUALITY CONTROL PROCEDURES

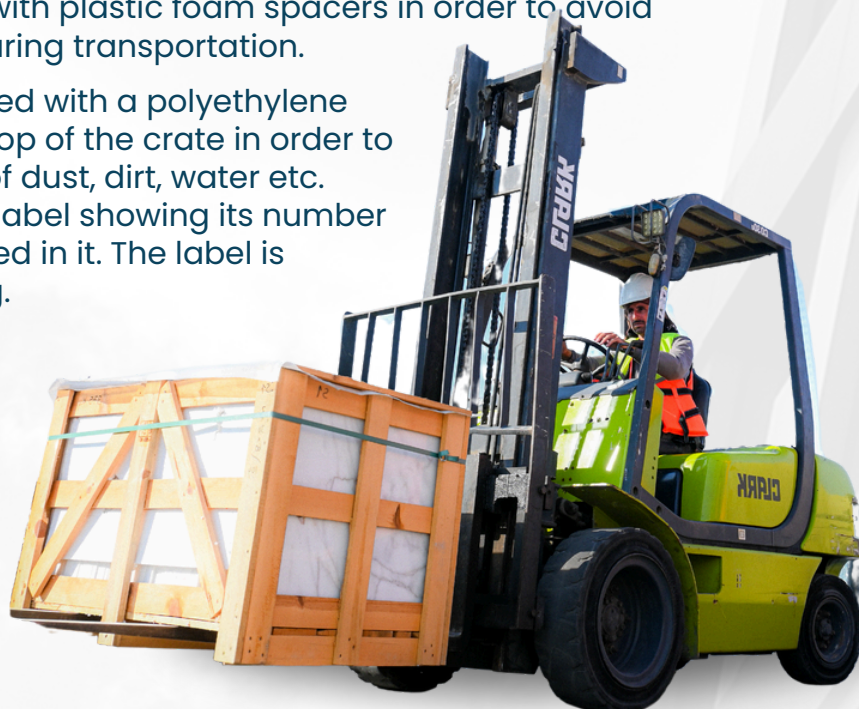

SPECIAL OPERATIONS:

Some pieces may require additional labor items after being cut to size and therefore pieces would be directed to the respective machinery or finishing places.

SLAB CONTROL:

- The pieces are packed in wood crates made out of hardwood such as Birch or Maple. The wooden crates are ordered in advance to accommodate the sizes of completed pieces.
- Each piece would be thoroughly checked against the approved color/tonality range before packing.
- And accuracy of the labor items before packing. Any piece outside the color/tonality range and or being outside the required sizes and tolerances would be rejected.
- The wooden crate would have polystyrene linen to prevent the natural stone's staining from contact with the wood and prevent the natural stone damage during transportation.
- Pieces would be packed with plastic foam spacers in order to avoid scratches or damages during transportation.
- All pieces would be covered with a polyethylene sheet before closing the top of the crate in order to avoid the accumulation of dust, dirt, water etc.
- Each crate would have a label showing its number and the stone mark packed in it. The label is protected in a plastic bag.

QUALITY CONTROL PROCEDURES

INDEPENDENT INSPECTOR:

The client may nominate an independent inspector who will be monitoring the natural stone fabrication and its quality. Ronak International would give access to the independent inspector to perform his tasks to the extent of his contact.

DOCUMENT CONTROL:

All inspection requests, communication concerning quality, and actions towards it, will be maintained for you to look over.

Copies to all concerned will be dispatched and filed. Periodical inspections are to cover all aspects of:

- Material storing.
- Material Selection
- Material fixing at sites.
- Tools quality

Notes arising from these inspections are to be summarized and copied to all concerned. Actions regarding these notes are to be publicized to department needs and all involved.

QUALITY CONTROL PROCEDURES:

- Method statement (submitted separately)
- ITP (submitted separately)

NON CONFORMANCES:

A – ADDITIVES

- **Marble & Granite**

Marble and granite materials received from abroad that is non – conformant with samples and / or specifications will be thoroughly tested. Incase the discrepancy is tolerable, the consultant shall be contacted and presented with fresh test results for further approval. Incase the discrepancy is high, the material will never be presented. The supplying company will be contacted in both cases and remedy is requested.

B – ADDITIVES

Only qualified brands of bonding agents, grouts, and similar materials will be considered for this project. After submission and approval of samples, technical sheets, and test results, only the approved brand will be used. The supplier is responsible for notifying the project team of any proposed changes to the approved specifications.

C– ADDITIVES

All masons, helpers, drivers and those involved are subjected to induction course about the nature of works. Specific details will be explained to the experienced masons. Logistics plan to be set and reciprocating information communication plan as well, to ensure everybody is aware of the jobs. Any non-conformance of quality of works, safety or delay will be investigated. Once the cause determined, corrective measures will be applied.

CAR (CORRECTIVE ACTIONS)

Each non conformance case will be dealt with to ensure it will not recur. The NCR report will be copied to all concerned reaching the head of the pyramid. The file will remain active until a corrective action report is done and approved and proved satisfactory.

SITE MEETINGS:

- **Internal site meeting :**

A regular site meeting headed by the project engineer to receive comments and hear out the obstacles will be made, and in turn to generalize plan of action and the strategy of works. Site Engineers, Foremen are to attend and implement decisions, whether disciplinary, quality or logistic.

- **Project site meeting :**

A weekly site meeting held with the project manager and the consultant in which information about the progress of works are reciprocated. Submittals, general conditions and inter communication with other contractors are discussed. Obstacles are highlighted in order to optimize work production.

HANDING OVER:

Having attended all comments of the consultant during the course of work, we will prepare a check list for the final hand over, mainly consisting of :

- Site clearance by contractor.
- Approved inspection for fixed marble.
- Approved inspection for final handing over.

HEALTH AND SAFETY POLICY STATEMENT

Safety and Wellbeing: A Cornerstone of Our Success:

Ronak International recognizes the paramount importance of the health, safety, and well-being of our employees. We believe these factors and the security of our facilities and assets form the cornerstone of our continued success. We are committed to a proactive safety culture, minimizing risks through comprehensive measures. This includes implementing a robust Health, Safety, and Environment (HSE) plan and utilizing relevant technologies to ensure a safe work environment.

Shared Responsibility for a Safe Workplace:

Employees play a vital role in maintaining a safe work environment. We foster a culture of safety where everyone is encouraged to fully cooperate in adhering to all safety rules, regulations, and the HSE plan.

Investing in Your Well-being:

Ronak International is dedicated to providing all our employees with a safe and comfortable work environment. We invest in your well-being by offering the necessary training and resources to prevent accidents and promote a culture of safety as a shared responsibility.

DOS AND DONTS

Our commitment to safety is paramount. We achieve this through clear and consistent communication of safety protocols. These protocols include:

- Maintaining a smoke-free environment in all factory and site areas.
- Prohibiting the consumption of alcohol and drugs on company premises.
- Ensuring proper de-energization of equipment after work hours.
- Authorizing only qualified personnel to handle electrical wiring.
- Promoting the secure storage of tools.
- Encouraging the consistent use of personal protective equipment (PPE), including hard hats and safety boots as minimum requirements.
- Maintaining clean and accessible corridors, rooms, and facilities for optimal safety.
- Adhering to safety officer instructions and directions.
- Reporting any potential hazards observed in the workplace.
- Promoting a positive and conflict-free work environment.
